GLUTEN-FREE RECIPE

MINIJUNIOR

Ideal for raising small breeds

For our young explorers, who want to experience great things and have big plans: Our special growth formula for small breeds containing the best nutrients to support healthy development. Accompanies puppies into adulthood without needing to switch their food and prevents the formation of tartar right from the outset.

- From 3 weeks on
- Small and delicious kibble made with fine duck and tender salmon
- Valuable fatty acids for healthy skin and a shiny coat
- Highly digestible recipe to reduce the amount of feces
- Also suitable for fully-grown mini breeds

Tartar prophylaxis

Reduced risk of tartar formation by binding calcium in the saliva.

Optimal development

Valuable fatty acids from salmon support brain development. L-carnitine and high quality proteins promote strong, lean muscles. Taurine and L-carnitine are important nutrients for the heart.

Small kibble size

The small kibble size helps small dogs chew the food better.

*The recommended amounts are per animal and per day. They are based on the weight of an adult dog. During growth, a moderate growth rate based on the correct energy supply is ideal. If your dog is too big and too heavy, it is recommended to reduce the feed intake. An adequate supply of nutrients is assured even in smaller portions.

MiniJunior - Complete feed for growing dogs.
