LIGHT & VITAL

Special formula for weight reduction and weight control

For sofa wolves that need to watch their figure. The reduced fat content and increased fibre content make for fewer calories, though the dog still feels full and satisfied. L-carnitine and taurine encourage good cardiac function and increase the dog's vitality.

- For overweight dogs or for dogs that tend towards obesity
- Special diet fibres make the dog feel full and satisfied
- The high protein content stimulates the dog's metabolism
- L-carnitine encourages proper fat metabolism

Weight control

Thanks to an especially fat-reduced formula and the presence of L-carnitine, this constitutes the ideal food for less active and/or elderly dogs.

Skeletal development

A well-balanced calcium phosphorus ratio, vitamin C, as well as manganese and copper, which are easy to absorb, support a strong bone structure and healthy joints.

A healthy heart

L-carnitine and taurine support cardiovascular functions.

Recommended amounts are per day.

Complete diet feed for adult dogs to help reduce obesity.

Composition: poultry protein (dried); pea flour; wholegrain barley; plant fibre; beet fibre; poultry fat; yeast (partially hydrolysed); poultry protein (hydrolysed); carob meal; minerals; psyllium husks; New Zealand greenlipped mussel meat (*Perna canaliculus*), dried.

Weight control: The amounts recommended are based on the dog's ideal weight and are designed to maintain its current weight.

Weight reduction: In order to reduce the dog's weight, you can feed up to 30% less. Afterwards, the recommended feeding amounts can be used to switch to weight control. We recommend seeking professional advice before beginning a weight reduction programme.
